

OLAMETER APPOINTS VICE PRESIDENT OF CONSULTING SERVICES

Aurora, March 20, 2009 -- Olameter Inc. today announced that Ms. Mae Reliszko has been appointed to the position of Vice President, Consulting Services.

Olameter has recently strengthened its Consulting Services offerings, and as such, the organizational structure has been modified to encompass four separate service divisions: Field Services, IT Solutions, Meter Services, and this new entity of Consulting Services. This modified structure will further ensure separation of Olameter's own technology and services offerings from the consultation provided.

"Mae has proven successful in the development of Olameter's Consulting Services offering, and as such we have seen fit to both divide this department from Olameter's other services divisions, as well as advance Mae as the continued leader of this entity," commented Jan Peeters, Olameter's CEO.

Consulting Services are offered across North America to utilities, retailers, application and technology providers, and related entities, and are currently focused on the integration of emerging critical technology applications with existing back-office systems. Under Mae's direction, Olameter's Consulting Services have been used by the IESO and are currently being provided to nine Local Distribution Companies within Ontario.

Mae has gained experience in developing and providing technology solutions within the telecommunications and utility markets over the past fifteen years. In her tenure at Olameter, Mae has previously served as Director of Billing before transitioning to Director of Integration Consulting. Since 2007, Mae has provided extensive consultation to LDCs and the IESO to facilitate system integration planning and implementation.

About Olameter

As a leading independent meter service company, Olameter offers a full range of telemetry and back-office systems for electric, gas, and water utilities and retailers. Olameter provides services to over 100 clients across North America, with a solution portfolio that includes AMI system monitoring & integration (via their *inView* application), meter data management, ASP data collection, workforce management (via their *onService* application), consumer web-presentment, integration consulting, ASP billing/CIS applications, call centre and back-office operations support, meter reading and field services (including meter installations), and meter service and sales. Olameter solutions are designed to maximize business returns through a proven implementation model that minimizes impact on the client, and assists in achieving deliverables such as improved cash flow, reduced costs, and enhanced customer loyalty.
